## **WSDOT's Freight Systems Division is seeking participants for on-line truck parking survey**

**Survey concludes March 23, 2008; information needed from drivers and carriers.**

WSDOT's Freight Systems Division is currently working to develop truck parking in Washington- especially along the I-5, I-90, I-82, and SR-167 corridors. To help secure funding for this endeavor, WSDOT's Freight Systems Division is conducting an on-line survey for the next three weeks to solicit information from our customers as to their current use of truck parking in Washington (both public and private) and their future requirements. This on-line survey is designed to gather input from both drivers and carriers; from those who use truck parking facilities regularly and those who are periodic users; those who utilize facilities for their HOS rest periods and those who only stop to use the facilities or grab a quick bite to eat.

WSDOT needs your recommendations on how to improve truck parking along I-5, I-90, and I-82, and your truck parking and services requirements to guide the development of proposed improvements to present to the Washington State Legislature. We are asking you to complete an online survey on your current truck parking practices and where truck parking improvements are needed. The survey will take between 10 and 15 minutes to complete. **Please complete the survey by March 23, 2008.**

If you are a truck driver please click this link (or paste it into your browser):
